I think either the developer has abandoned this or this was just a cash grab. There hasn't been a single update to this since I purchased it quite a while ago and the update history is completely empty. I wouldn't consider this a full game so it isn't worth the money to buy.. I hope there are more info to how to play the game. I'm currently planting trees in my bed?! and I'm building floors to another island and these black dudes suddenly appear behind me and kill me? Like its messed up, pretty laggy and needs a lot of work but I feel like there's potential.. Stupid crap based on Unity engine. Cmon kids, hate me.
