30 seconds of framerate can be attributed to the city's size and number of characters. It is also expected that a lot of the lag will be from the fact that the video game is set during the French Revolution. The game was released in October. The game has been given an average score of 77.9% at GameRankings and 82/100 at Metacritic. Destructoid wrote "The Ubisoft Montreal team has a long history of making exceptional games, and this title is no exception. The game is absolutely worth a purchase." Eurogamer called the game "ambitious and utterly fascinating", and wrote "Unity ... is a unique proposition, a cross between Assassin's Creed and Assassin's Creed II. It is a truly extraordinary piece of work." Tom Senior from Eurogamer also wrote "The best Assassin's Creed game since Black Flag. Unity is all the more remarkable for its ability to get inside the heads of the enemy. It's a game of duality, of subtlety and stealth." IGN wrote "Unity is a visual marvel, but it also feels like a disjointed work. It doesn't flow like the series is supposed to, which is a problem for a franchise with a long history." Polygon wrote "Unity succeeds as a reboot, but it feels like a missed opportunity. It's a solid game with a lot to offer, but it doesn't do enough to justify the effort."
